

Manufacturer's Declaration

FRM(-NOC) 1000xx/SAV family and SAV 1000xx family with up to 25 % hydrogen by volume in natural gas

Karl Dungs GmbH & Co. KG hereby confirms:

The products listed in the scope are suitable for operation for up to 25 % hydrogen by volume in natural gas.

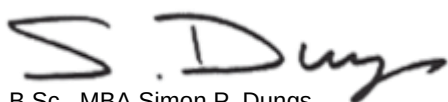

DUNGS recommends using the products mentioned in the scope only with SSDs (safety shut-off devices) of functional class A according to EN 14382.

Note: The suitability of the application for operation with natural gas-hydrogen mixtures with a content of ≤ 25 % hydrogen by volume must be ensured with a risk assessment of the application operator prior to initial operation.

Scope

Pressure Regulator
FRM 1000xx/SAV
FRM-NOC 1000xx/SAV
SAV 1000xx
