Ethernet Gigabit Modular Switch with four 1000 Mbps combo ports and twelve 10/100 Mbps RJ45 slots, can be extended by an extension station to up to 24 ports, with integrated routing function

Gigabit Modular Switch with integrated routing function

Product Description

The Gigabit Modular Switch is a high-performance managed switch, which covers the port requirements of industrial applications in a modular and flexible way. It also supports all popular Gigabit and Fast Ethernet transmission standards, IT standard protocols, and the PROFINET and EtherNet/IP™ automation protocols. For use in the production backbone or automation cell, the FL SWITCH GHS 4G/12 has four integrated Gigabit ports, which can either be used via SFP modules or twisted pair connections. In addition to the four integrated 100 Mbps TX ports, up to 16 more 100 Mbps ports can be used via interface modules.

The switch can be configured as a router using the integrated Layer 3 license. The GHS switch can be routed into up to 28 different subnetworks. It can also be operated as a redundant router using VRRP (Virtual Redundancy Routing Protocol) .

Your advantages

- ✓ Connection of Gigabit fiberglass via FL SFP plug-in modules
- ✓ Integrated routing function
- ✓ Security in the automation network according to IEEE 802.1X
- ✓ Connection of connection media that can be assembled in the field, such as POF, HCS, and GI HCS
- ✓ Quick and easy local configuration options with the new operator/display interface

Key Commercial Data

Packing unit	1 pc
GTIN	 4 046356 647151
GTIN	4046356647151
Weight per Piece (excluding packing)	3,080.000 g
Custom tariff number	85176200
Country of origin	Germany
