

## Inline terminal - IB IL TEMP 2 UTH-PAC - 2861386

Please be informed that the data shown in this PDF Document is generated from our Online Catalog. Please find the complete data in the user's documentation. Our General Terms of Use for Downloads are valid (<http://phoenixcontact.com/download>)

Inline, Temperature measurement terminal, Analog UTH inputs: 2 (Thermocouples or linear voltage), connection technology: 2-conductor, transmission speed in the local bus: 500 kbps, degree of protection: IP20, including Inline connector and labeling field

### Product Description

The terminal is designed for use within an Inline station.

This terminal can be used to acquire signals from standard thermocouples.

It supports 13 different types of thermocouples according to DIN EN 60584-1 and DIN 43710, as well as a linear voltage input of -15 mV to +85 mV.

### Your advantages

- ✓ 2 differential inputs for thermocouples or linear voltage
- ✓ 1 input for an external cold junction, Pt 1000 or Ni 1000
- ✓ The channels are parameterized independently of one another via the bus system
- ✓ Internal detection and compensation of cold junction temperature (can be parameterized)
- ✓ Absolute and differential temperature measurement (can be parameterized)
- ✓ Pt 1000 sensor in the vicinity of the connection terminal blocks of the thermocouple inputs for internal measurement of the cold junction temperature
- ✓ Measured values can be represented in three different formats

**RoHS**
