16-channel analog input module with screw connection, redundant voltage supply, and additional jumpers for each channel. Suitable for Yokogawa SAI 143 card.

Product Description

These modules have been specifically developed to connect analog I/O cards to the field level using pre-assembled system cables. The modules offer the following features:

- Transmission of up to 16 channels
- Two parallel system connections for redundant applications
- Fuse and LED per channel
- 2- or 3-conductor connection for each channel depending on the jumper position
- Screw connection

The following input cards can be connected:
SAI 143

RoHS
