| Converter losses to IEC61800-9-2* | | |
|--|--------|--|
| Efficiency class | IE2 | |
| Comparison with the reference converter (90% / 100%) | 31.0 % | |

The percentage values show the losses in relation to the rated apparent power of the converter.

The diagram shows the losses for the points (as per standard IEC61800-9-2) of the relative torque generating current (I) over the relative motor stator frequency (f). The values are valid for the basic version of the converter without options/components.

^{*}calculated values

¹⁾ The output current and HP ratings are valid for the voltage range 440V-480V
