## IP 54 Floor-Standing Enclosure with Separate Air Flows

### Standard Compact Floor-Standing Enclosure

### Standard Floor-Standing Enclosure + Additional Enclosures, According to the Configuration

(1) Seal. For each floor-standing enclosure added, allow a 4 mm/0.15 in. space for the seal.

(2) Standard version floor-standing enclosure.

NOTE: The position of the enclosures must be complied with during installation. The number of additional enclosures can vary according to the chosen configuration.

## IP 54 Floor-Standing Enclosure with Separate Air Flows

### Wiring Diagram

- A1 Drive
- A2 Enclosure
- F1 Fast-acting semi-conductor fuse
- IL1, Line chokes
- IL2
- L1 DC choke
- Q1 Switch
- (1) Fault relay contacts. For remote signalling of drive status.
- (2) Only for ATV•1EXS5•••N and ATV•1EXS5•••Y.

Derating Curves

The derating curves for the drive nominal current ( $I_n$ ) are dependent on the temperature and switching frequency. For intermediate temperatures, interpolate between 2 curves.

NOTE: The drive will reduce the switching frequency automatically in the event of excessive temperature rise.

X Switching frequency (kHz)

NOTE: The temperatures shown correspond to the temperature of the air entering the enclosure.
