## Target pucks for valve actuators

PUCK/IND/33

| Application               |                                                                                                                                                                                                           |
|---------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Design                    | for butterfly valve                                                                                                                                                                                       |
| Mechanical data           |                                                                                                                                                                                                           |
| Weight [g]                | 35                                                                                                                                                                                                        |
| Target puck diameter [mm] | 45                                                                                                                                                                                                        |
| Materials                 | target puck: PVC; pointer: PVC; screws: stainless steel (1.4404 / 316L); washers: stainless steel (1.4404 / 316L); set screw: stainless steel (1.4305 / 303); locking pin: stainless steel (1.4301 / 304) |
| Remarks                   |                                                                                                                                                                                                           |
| Pack quantity             | 1 pcs.                                                                                                                                                                                                    |
