## Detailed technical data

### Features

|                                                             |                                                                                                                                                                                                                                                                         |
|-------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Medium</b>                                               | Dry compressed air                                                                                                                                                                                                                                                      |
| <b>Pressure type</b>                                        | Gauge pressure                                                                                                                                                                                                                                                          |
| <b>Pressure unit</b>                                        | bar                                                                                                                                                                                                                                                                     |
| <b>Measuring range</b>                                      | 0 bar ... 6 bar                                                                                                                                                                                                                                                         |
| <b>Overpressure safety</b>                                  | 15 bar                                                                                                                                                                                                                                                                  |
| <b>Process temperature</b>                                  | 0 °C ... +60 °C                                                                                                                                                                                                                                                         |
| <b>Analog signal output and ohmic load <math>R_A</math></b> | Optional, 4 mA ... 20 mA / 0 V ... 10 V. Automatic detection depending on connected load or programmable. Output signals can be inverted: 20 mA ... 4 mA / 10 V ... 0 V<br>Load resistance for current output < 600 Ohm<br>Load resistance with current output > 3 kOhm |
| <b>Zero point adjustment</b>                                | Max. + 5 % of span                                                                                                                                                                                                                                                      |
| <b>Output signal</b>                                        | IO-Link/PNP + PNP/NPN/Push-Pull + 4 mA ... 20 mA / 0 V ... 10 V                                                                                                                                                                                                         |
| <b>Diagnostics output</b>                                   | Switching output 2 can be set as diagnostics output                                                                                                                                                                                                                     |
| <b>Display</b>                                              | LCD with LED backlight (green/red), can be rotated electronically by 180°<br>Pressure display: 4 digits, 16 segments<br>Pressure unit in display can be switched: bar, MPa, kPa, psi and inHg<br>Update: 1,000, 500, 200, 100 ms (adjustable)                           |
| <b>Initialization time</b>                                  | 300 ms                                                                                                                                                                                                                                                                  |

### Mechanics/electronics

|                           |                                                                          |
|---------------------------|--------------------------------------------------------------------------|
| <b>Process connection</b> | 2 x G 1/4 <sup>1)</sup>                                                  |
| <b>Housing material</b>   | Housing: polycarbonate, Buttons: TPE, DIN rail mounting: POM, seals: NBR |
| <b>Connection type</b>    | Round connector M12 x 1, 5-pin                                           |
| <b>Supply voltage</b>     | 17 V DC ... 30 V DC                                                      |
| <b>Power consumption</b>  | Max. 40 mA at $L^+$ = 24 VDC                                             |
| <b>Electrical safety</b>  | Protection class: III<br>Overvoltage protection: 32 V DC                 |

<sup>1)</sup> Bottom side: thread G 1/4 female, back side: thread G 1/4 female, both according to DIN ISO 1630.

<sup>2)</sup> When plugged in with a suitable mating connector.

|                             |                                                                                                                                                             |
|-----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                             | Short-circuit protection: Q <sub>A</sub> , Q <sub>1</sub> , Q <sub>2</sub> towards M and L <sup>+</sup><br>Reverse polarity protection: L <sup>+</sup> to M |
| <b>CE-conformity</b>        | EMC directive: 2004/108/EC, EN 61326-2-3                                                                                                                    |
| <b>Weight sensor</b>        | Approx. 40 g                                                                                                                                                |
| <b>Enclosure rating</b>     | IP65 / IP67 (according to IEC 60529) <sup>2)</sup>                                                                                                          |
| <b>Protection class III</b> | ✓                                                                                                                                                           |
| <b>RoHS certificate</b>     | ✓                                                                                                                                                           |
| <b>CRUus certificate</b>    | ✓                                                                                                                                                           |

<sup>1)</sup> Bottom side: thread G ¼ female, back side: thread G ¼ female, both according to DIN ISO 1630.

<sup>2)</sup> When plugged in with a suitable mating connector.

## Performance

|                                              |                                                                            |
|----------------------------------------------|----------------------------------------------------------------------------|
| <b>Non-linearity</b>                         | ≤ ± 0.5 %, of span (Best Fit Straight Line, BFSL) according to IEC 61298-2 |
| <b>Accuracy</b>                              | ≤ ± 1.5 % of the span                                                      |
| <b>Setting accuracy of switching outputs</b> | ≤ ± 0.2 % of span                                                          |
| <b>Non-repeatability</b>                     | ≤ ± 0.2 % of the span                                                      |
| <b>Rated temperature range</b>               | +10 °C ... +60 °C                                                          |

## Ambient data

|                            |                                                                      |
|----------------------------|----------------------------------------------------------------------|
| <b>Ambient temperature</b> | 0 °C ... +60 °C                                                      |
| <b>Storage temperature</b> | -20 °C ... +80 °C                                                    |
| <b>Relative humidity</b>   | ≤ 90 %                                                               |
| <b>Shock load</b>          | Max. 30 g, xyz according to IEC 60068-2-27 (11 ms, mechanical shock) |
| <b>Vibration load</b>      | Max. 5 g (10 ... 150 Hz), xyz, to DIN EN 60068-2-6                   |

## SICK AT A GLANCE

SICK is one of the leading manufacturers of intelligent sensors and sensor solutions for industrial applications. A unique range of products and services creates the perfect basis for controlling processes securely and efficiently, protecting individuals from accidents and preventing damage to the environment.

We have extensive experience in a wide range of industries and understand their processes and requirements. With intelligent sensors, we can deliver exactly what our customers need. In application centers in Europe, Asia and North America, system solutions are tested and optimized in accordance with customer specifications. All this makes us a reliable supplier and development partner.

Comprehensive services complete our offering: SICK LifeTime Services provide support throughout the machine life cycle and ensure safety and productivity.

For us, that is “Sensor Intelligence.”
