### Detailed technical data

#### Features

|                                        |                                                                                  |
|----------------------------------------|----------------------------------------------------------------------------------|
| <b>Sensor/ detection principle</b>     | Photoelectric proximity sensor, Background suppression                           |
| <b>Dimensions (W x H x D)</b>          | 7.7 mm x 21.8 mm x 13.5 mm                                                       |
| <b>Housing design (light emission)</b> | Rectangular                                                                      |
| <b>Sensing range max.</b>              | 1 mm ... 66 mm <sup>1)</sup>                                                     |
| <b>Preset sensing range</b>            | 50 mm                                                                            |
| <b>Sensing range</b>                   | 5 mm ... 60 mm <sup>1)</sup>                                                     |
| <b>Type of light</b>                   | Visible red light                                                                |
| <b>Light source</b>                    | PinPoint LED <sup>2)</sup>                                                       |
| <b>Light spot size (distance)</b>      | Ø 4.4 mm (60 mm)                                                                 |
| <b>Wave length</b>                     | 640 nm                                                                           |
| <b>Adjustment</b>                      | IO-Link                                                                          |
| <b>Pin 2 configuration</b>             | External input, Teach-in input, Sender off input, Detection output, logic output |
| <b>Special applications</b>            | Detecting small objects                                                          |
| <b>IO-Link functions</b>               | Standard functions                                                               |
| <b>Special features</b>                | Parameter presettings: 1,000 ms on delay on QL1                                  |

<sup>1)</sup> Object with 90 % reflectance (referred to standard white, DIN 5033).

<sup>2)</sup> Average service life: 100,000 h at T<sub>U</sub> = +25 °C.

## Mechanics/electronics

|                                            |                                                          |
|--------------------------------------------|----------------------------------------------------------|
| <b>Supply voltage</b>                      | 10 V DC ... 30 V DC <sup>1)</sup>                        |
| <b>Ripple</b>                              | $\leq 5 \text{ V}_{pp}$ <sup>2)</sup>                    |
| <b>Current consumption</b>                 | 20 mA <sup>3)</sup>                                      |
| <b>Switching output</b>                    | PNP, Complementary <sup>4)</sup>                         |
| <b>Switching mode</b>                      | Light/dark switching <sup>4)</sup>                       |
| <b>Switching mode selector</b>             | Programmable                                             |
| <b>Output current <math>I_{max}</math></b> | < 50 mA                                                  |
| <b>Response time</b>                       | < 0.5 ms <sup>5)</sup>                                   |
| <b>Response time Q/ on Pin 2</b>           | 300 $\mu\text{s}$ ... 450 $\mu\text{s}$ <sup>5) 6)</sup> |
| <b>Switching frequency</b>                 | 1,000 Hz                                                 |
| <b>Switching frequency Q / to pin 2</b>    | 1,000 Hz <sup>6) 7)</sup>                                |
| <b>Connection type</b>                     | Cable, 4-wire, 3.1 m <sup>8)</sup>                       |
| <b>Cable material</b>                      | PVC                                                      |
| <b>Cable diameter</b>                      | $\varnothing 3 \text{ mm}$                               |
| <b>Circuit protection</b>                  | A <sup>9)</sup><br>B <sup>10)</sup><br>D <sup>11)</sup>  |
| <b>Protection class</b>                    | III                                                      |
| <b>IO-Link</b>                             | ✓                                                        |
| <b>Transmission rate</b>                   | COM2                                                     |
| <b>Housing material</b>                    | Plastic, ABS/PC                                          |
| <b>Optics material</b>                     | Plastic, PMMA                                            |
| <b>Enclosure rating</b>                    | IP67                                                     |
| <b>Description</b>                         | IO-Link                                                  |
| <b>Ambient operating temperature</b>       | -25 °C ... +50 °C                                        |
| <b>Ambient storage temperature</b>         | -40 °C ... +75 °C                                        |
| <b>UL File No.</b>                         | NRKH.E181493                                             |
| <b>Repeatability Q/ on Pin 2:</b>          | 150 $\mu\text{s}$ <sup>6)</sup>                          |

<sup>1)</sup> Limit values.

<sup>2)</sup> May not exceed or fall below  $U_V$  tolerances.

<sup>3)</sup> Without load.

<sup>4)</sup> Parametrisable via IO-Link.

<sup>5)</sup> Signal transit time with resistive load.

<sup>6)</sup> Valid for Q \ on Pin2, if configured with software.

<sup>7)</sup> With light/dark ratio 1:1.

<sup>8)</sup> Do not bend below 0 °C.

<sup>9)</sup> A =  $V_S$  connections reverse-polarity protected.

<sup>10)</sup> B = output reverse-polarity protected.

<sup>11)</sup> D = outputs overcurrent and short-circuit protected.

## Communication interface

| <b>Switching signal Q<sub>L2</sub></b> | Switching output                                                                                                                  |

<sup>1)</sup> SIO Direct: sensor operation in standard I/O mode without IO-Link communication and without using internal sensor logic or time parameters (set to "direct"/"deactivated").

<sup>2)</sup> SIO Logic: Sensor operation in standard I/O mode without IO-Link communication. Sensor-internal logic or timing parameters plus Automation Functions used.

<sup>3)</sup> IOL: Sensor operation with full IO-Link communication and usage of logic, timing and Automation Function parameters.

| <ul style="list-style-type: none"> <li><b>Description:</b> The Function Block Factory supports common programmable logic controllers (PLCs) from various manufacturers, such as Siemens, Beckhoff, Rockwell Automation and B&amp;R. More information on the FBF can be found <a href="https://fbf.cloud.sick.com target=_blank">here</a>.</li> </ul> | Function Block Factory | On request |

## SICK AT A GLANCE

SICK is one of the leading manufacturers of intelligent sensors and sensor solutions for industrial applications. A unique range of products and services creates the perfect basis for controlling processes securely and efficiently, protecting individuals from accidents and preventing damage to the environment.

We have extensive experience in a wide range of industries and understand their processes and requirements. With intelligent sensors, we can deliver exactly what our customers need. In application centers in Europe, Asia and North America, system solutions are tested and optimized in accordance with customer specifications. All this makes us a reliable supplier and development partner.

Comprehensive services complete our offering: SICK LifeTime Services provide support throughout the machine life cycle and ensure safety and productivity.

**For us, that is “Sensor Intelligence.”**
