## Detailed technical data

### Performance

|                                                               |                                    |
|---------------------------------------------------------------|------------------------------------|
| <b>Pulses per revolution</b>                                  | 150 <sup>1)</sup>                  |
| <b>Measuring step</b>                                         | 90° electric/pulses per revolution |
| <b>Measuring step deviation at non binary number of lines</b> | ± 0.01°                            |
| <b>Error limits</b>                                           | ± 0.05°                            |

<sup>1)</sup> See maximum revolution range.

### Interfaces

|                                        |                                                                 |
|----------------------------------------|-----------------------------------------------------------------|
| <b>Communication interface</b>         | Incremental                                                     |
| <b>Communication Interface detail</b>  | HTL / Push pull                                                 |
| <b>Number of signal channels</b>       | 6-channel                                                       |
| <b>0-set function via hardware pin</b> | ✓                                                               |
| <b>0-SET function</b>                  | H-active, L = 0 - 3 V, H = 4,0 - U <sub>s</sub> V <sup>1)</sup> |
| <b>Initialization time</b>             | 30 ms                                                           |
| <b>Output frequency</b>                | ≤ 600 kHz                                                       |
| <b>Load current</b>                    | ≤ 30 mA                                                         |
| <b>Power consumption</b>               | ≤ 0.7 W (without load)                                          |
| <b>4.5 V... 5.5 V, TTL/RS-422</b>      |                                                                 |
| Load current                           | ≤ 30 mA                                                         |
| <b>4.5 V ... 5.5 V, Open Collector</b> |                                                                 |
| Load current                           | ≤ 30 mA                                                         |
| <b>TTL/RS-422</b>                      |                                                                 |
| Load current                           | ≤ 30 mA                                                         |
| Power consumption                      | ≤ 0.7 W (without load)                                          |
| <b>HTL/Push pull</b>                   |                                                                 |
| Load current                           | ≤ 30 mA                                                         |
| Power consumption                      | ≤ 0.7 W (without load)                                          |

|                       | Power consumption | ≤ 0.7 W (without load) |

<sup>1)</sup> Only with devices with M23 connector in connection with electrical interfaces M, U, V and W.

## Electrical data

|                                                |                                             |
|------------------------------------------------|---------------------------------------------|
| <b>Connection type</b>                         | Male connector, M23, 12-pin, radial         |
| <b>Supply voltage</b>                          | 4.5 ... 32 V                                |
| <b>Reference signal, number</b>                | 1                                           |
| <b>Reference signal, position</b>              | 90°, electric, logically gated with A and B |
| <b>Reverse polarity protection</b>             | ✓                                           |
| <b>Short-circuit protection of the outputs</b> | ✓ <sup>1)</sup>                             |
| <b>MTTFd: mean time to dangerous failure</b>   | 300 years (EN ISO 13849-1) <sup>2)</sup>    |

<sup>1)</sup> Short-circuit opposite to another channel, US or GND permissible for maximum 30 s.

<sup>2)</sup> This product is a standard product and does not constitute a safety component as defined in the Machinery Directive. Calculation based on nominal load of components, average ambient temperature 40 °C, frequency of use 8760 h/a. All electronic failures are considered hazardous. For more information, see document no. 8015532.

## Mechanical data

|                                               |                                         |

<sup>1)</sup> For electrical interfaces only: M, U, V, W with 0-SET function on PIN 7 on M23 male connector. The 0-SET input is used to set the zero pulse on the current shaft position. If the 0-SET input is connected to U<sub>s</sub> for longer than 250 ms after it had previously been unassigned for at least 1,000 ms or had been connected to the GND, the current position of the shaft is assigned to the zero pulse signal "Z".

## SICK AT A GLANCE

SICK is one of the leading manufacturers of intelligent sensors and sensor solutions for industrial applications. A unique range of products and services creates the perfect basis for controlling processes securely and efficiently, protecting individuals from accidents and preventing damage to the environment.

We have extensive experience in a wide range of industries and understand their processes and requirements. With intelligent sensors, we can deliver exactly what our customers need. In application centers in Europe, Asia and North America, system solutions are tested and optimized in accordance with customer specifications. All this makes us a reliable supplier and development partner.

Comprehensive services complete our offering: SICK LifeTime Services provide support throughout the machine life cycle and ensure safety and productivity.

For us, that is “Sensor Intelligence.”
