

## Motor feedback systems rotary incremental VFS60

VFS60E-BCEK01024

**Model Name** > **VFS60E-BCEK01024**  
**Part No.** > **-\***

*Illustration may differ*

\* When ordering for the first time, please use the information in "Model Name" instead of "Part No."

#### At a glance

- TTL, HTL or sine 0.5 VSS interfaces
- Resolution of up to 65,536 lines per revolution
- Individual programming of the interface, line count and of the zero pulse
- Direct programming via RS485
- Excellent concentricity through large distance between the ball bearings
- Exceptional robustness and protection class IP 65
- Mechanical flexibility through blind hollow shaft and through hollow shafts with diameters of 8 to 15 mm, available with various torque supports
- Temperature range from -30 °C to +100 °C

#### Your benefits

- Programmable version for a reduced product variety
- Various programming tools designed to take into account your own programming requirements
- High performance and reliability even in rough ambient conditions
- Large ball bearing distances reduce uneven wear and minimize vibration on the motor feedback housing, which increases the motor feedback system's service life
- High vibration resistance and extended temperature range through nickel code disk

#### Performance

|                                 |                                         |
|---------------------------------|-----------------------------------------|
| Number of lines per revolution: | 1,024                                   |
| Reference signal, number:       | 1                                       |
| Reference signal, position:     | 90 ° electronically, gated with A and B |
| Error limits:                   | ± 0.3 °                                 |
| Measuring step deviation:       | ± 0.2 °                                 |
| Maximum initialisation time:    | 40 ms                                   |

#### Mechanical data

|                              |                    |
|------------------------------|--------------------|
| Shaft version:               | Blind hollow shaft |
| Shaft diameter:              | 3/8 "              |
| Shaft material:              | Metal              |
| Shaft plug-in length:        | 15 mm ... 42 mm    |
| Flange type/stator coupling: | Standard           |

|                                              |                                           |
|----------------------------------------------|-------------------------------------------|
| Dimensions:                                  | See dimensional drawing                   |
| Mass:                                        | 0.2 kg                                    |
| Moment of inertia of the rotor:              | 40 gcm <sup>2</sup>                       |
| Maximum operating speed:                     | 6,000 /min <sup>1)</sup>                  |
| Maximum angular acceleration:                | 500,000 rad/s <sup>2</sup>                |
| Operating torque:                            | 0.6 Ncm (20 °C)                           |
| Start up torque:                             | 0.8 Ncm (20 °C)                           |
| Permissible shaft movement, radial, dynamic: | ± 0.1 mm                                  |
| Permissible shaft movement, axial, dynamic:  | ± 0.2 mm                                  |
| Life of ball bearings:                       | 3.0 x 10 <sup>9</sup> revolutions         |
| Connection type:                             | Cable, 8-pin, radial, 1.5 m <sup>2)</sup> |

<sup>1)</sup> Self-warming 3.3 K/1,000 1/min, when applying note working temperature range <sup>2)</sup> The universal cable outlet is positioned in such a way, that it is possible to lay the cable in a radial or axial direction without kinking it

### Electrical data

|                                         |                     |
|-----------------------------------------|---------------------|
| Electrical interface:                   | HTL/Push pull       |
| Operating voltage range/supply Voltage: | 10 V ... 32 V       |
| Maximum output frequency:               | 300 kHz             |
| Maximum load current:                   | 30 mA               |
| Operating power consumption (no load):  | 40 mA <sup>1)</sup> |

<sup>1)</sup> Without load

### Ambient data

|                                 |                                                                                                       |
|---------------------------------|-------------------------------------------------------------------------------------------------------|
| Working temperature range:      | -30 °C ... 100 °C                                                                                     |
| Storage temperature range:      | -40 °C ... 100 °C, without package                                                                    |
| Relative humidity/Condensation: | 90 %, condensation of the optical scanning not permitted                                              |
| Resistance to shocks:           | 70 g, 6 ms (according to EN 60068-2-27)                                                               |
| Resistance to vibration:        | 30 g, 10 Hz ... 2,000 Hz (according to EN 60068-2-6)                                                  |
| EMC:                            | (according to EN 61000-6-2 and EN 61000-6-4)                                                          |
| Enclosure rating:               | IP 65 (according to IEC 60529), shaft side, IP 67 (according to IEC 60529), housing side cable outlet |
